

Walden Local Meat Co. Supplier Affidavit

I _____, certify and guarantee that the pigs or pork products I am selling to Walden Local Meat Co. (Walden) have been raised according to the following criteria:

- Pigs are raised outdoors at all times during the growing season (at least 120 days annually), on pesticide & herbicide free pasture or forested areas, and rotated to new areas regularly to maintain vegetative cover;
- When in shelters during winter, pigs maintain continuous access to the outdoors except in extreme weather conditions (less than 10 days annually), and deep bedding ensures no visible concrete;
- Tooth clipping, grinding or filing; detusking are never performed, and disk or septum nose rings are never employed;
- Electric prods are never utilized for handling; humane methods are used for transport, loading and holding;
- Pigs sold to Walden are never given antibiotics, growth enhancers or hormones of any kind, whether injected or fed. When antibiotics are used to treat illness, this is documented to ensure these pigs are not sold to Walden.
- Pigs are not auction animals; they were born and raised on my farm, or born on a trusted partner farm who can attest that feeder pigs meet these criteria.
