

Jr. Full Stack Engineer

Billerica, MA

Company: Walden is a 5-year old mission driven startup with a goal of reinvigorating local agricultural economies, in support of healthier animals, soils, and communities. We market and distribute sustainable meat that you can truly feel good about - from a health, economic, environmental and ethical perspective. With both a consumer retail and wholesale business, we have significant market traction as the leading direct to consumer branded meat in the Northeast, with a vision of replicating our model in other metropolitan areas.

Role: As a Jr. Full Stack Engineer at Walden, you will be working with an extremely modern web stack on internal and member-facing projects. You will need to be able to work inside and outside your comfort zone, learning new technologies as needed to tackle a variety of business problems with a focus on quality and security.

Software Stack:

- Node.js 8+ with full ES6 support (async await, native promises, etc.)
- Continuous deployment using Jenkins CI
- Sequelize ORM for database management and migration
- Ember.js, React.js, and Bootstrap 4
- Restify and Swagger
- Cloud hosting with Amazon Web Services (Aurora DB, Elastic Beanstalk, Cloudfront, etc)
- Elasticsearch, Kibana, and Cloudwatch monitoring stack
- Agile development with JIRA

Responsibilities:

- Manage time and work independently to build new features and tools in JavaScript
- Utilize Qunit and Jest to develop automated tests
- Participate in core development discussions, with willingness to propose and implement real solutions

Qualifications:

- Good professional communication and presentation skills
- Ability to work with minimal guidance, handle uncertainty, and adapt to changing priorities
- Experience with JavaScript or asynchronous/threaded development in another functional language
- Experience with HTML/CSS

Valued attributes and skills:

- Passion for our mission and sustainable agriculture/food
- Creativity and a passion for writing code you can be proud of
- Experience with one or more front-end frameworks (Ember.js, React.js, Angular, Vue)
- Experience with Amazon Web Services/Cloud Computing
- Experience with Linux and basic computer networking concepts
- Experience with a relational database such as MySQL/MariaDB, Postgres, or CassandraDB
