

I, _____, certify and guarantee that the poultry I am selling to Walden Local, Inc. have been raised according to the following criteria:

- Poultry have never received antibiotics of any kind, whether injected or fed
- No animal byproducts or GMOs in feed
- No physical alterations, including beak trimming
- Poultry are raised outdoors in groups of less than 500, on pasture with at least 75% vegetative cover (after up to 4 weeks in a brooder) and moved regularly to fresh pasture
- Poultry are handled minimally prior to slaughter and humanely handled during transport.
 - Birds are collected in low lighting and are never handled more than two at a time by handler
- Poultry are provided access to clean, fresh water at all times and a diet ensuring optimal nutrition for stage of life
- When sick poultry are identified, they are segregated and quarantined from other birds until returned to health.
- Chickens or turkeys that appear sick, injured or otherwise abnormal are segregated from the group to an independent holding area separate from normal chickens. If chickens recover, they are returned to the main group of market animals. If they do not recover, or any antibiotic treatment of any kind is administered, these animals are not sold to Walden.
- I certify that we purchase chicks from independently certified antibiotic-free suppliers that do not use antibiotics pre-hatch and do not inject antibiotics in ovo, and I will provide records demonstrating this for each group of purchased chickens.

Signed on this ____ day of _____, 20____
